## Argument

The plant heritage encompasses all plant species, their diverse landscape arrangements, and their related ecosystems. There is a variety of plants in this, either wild or cultivated, which represent the vegetative cover of natural parks or gardens, urban parks, or archaeological sites, and tree alignments along trails.

At that point, the plant heritage becomes a priceless legacy with valuable natural and cultural attributes. It is considered as a valuable element because it contributes to the beauty of public spaces and improves the quality of life of individuals.

The preservation of built heritage and natural heritage is often associated with each other. Despite the fact that plant heritage is valued as a biological and environmental resource that should be preserved, it also needs characteristics that guarantee it will continue to have cultural significance in relation to the built heritage with which it is in communion.

This study day aims to investigate all correlations between dependencies and meanings, both natural and cultural, in order to halt its patrimonialization process while taking into account the connections that bind the natural world culture.

This study day will also serve as an opportunity for participants to address issues related to the identification, assessment, and management of the plant heritage by addressing the various issues that oppose it.

## The study day's schedule

09h00	Opening speech
09h20	➤ Pr. Kahina DJIAR (Head of EPAU). ➤ Pr. Youcef CHENNAOUI (Director of LVAP).
09h25	The plant heritage. What? Why? And how?
09h45	Pr. Youcef CHENNAOUI (EPAU)
09h50	The plant resource, an opportunity to articulate the different scales of projects
10h10	Pr. Naïma CHABBI-CHEMROUK (EPAU)
10h15	The beginnings of landscape architecture in Algiers during the colonial period
10h35	Dr. Belgacem SOUICI (EPAU)
10h40	Nature and culture : complex links in Roman-African antiquity
11h00	Pr. Sabah FERDI (Eméritat, CNRA)
11h05	The vegetal register represented on the earthenware tiles of the Ottoman era in Algiers
11h25	Mme Rachida ZEKAGH-HADJI & Pr. Youcef CHENNAOUI (EPAU)
11h30	The palm tree between identity heritage and nourishing source in the Ksourian landscape
11h50	Dr. Sara FERHAT (EPAU)
11h55	Tree heritage and landscape in Kabylie : the case of the olive tree.
12h15	Mr Kheir-eddine GUERROUCHE (EPAU)
12h20	Methodological contribution to the process of assessing and managing visual qualities of the vegetation landscape in archaeological parks.
12h40	Mlle Selma DAHMANI & Pr. Youcef CHENNAOUI (EPAU)
12h45	The metamorphosis of the « Sidi Yahia » district: the decline of a plant heritage and the emergence of new consumption spaces.
13h05	Mme Ouafa KADRI & Pr. Maha MESSAOUDENE (EPAU)
13h10	Advocacy for the patrimonialization of the EPAU through its green spaces.
13h30	Pr. Youcef CHENNAOUI (EPAU)
13h30	Discussion
14h00	Closing remarks from the Director of LVAP and distribution of participation certificates. Pr. Youcef CHENNAOUI (Directeur du LVAP)
