In face of urgency Act Now!

Join this Symposium and contribute to building an ethical future where human and environmental health are central priorities.

Your participation will make a difference.

Don't miss this unique opportunity to build a sustainable future for all!

Environmental Health and Law National Symposium

Convergence for an Ethical Future

TARGET AUDIENCE

- Architects and urban planners.
- Health professionals (doctors, researchers, etc.).
- Scientists and environmental researchers.
- Legal experts in environmental law.
- Political actors (ministries, local authorities).
- Field workers.
- General public interested in the symposium topics.
- Media.

CONTEXT AND JUSTIFICATION

Environmental health and sustainable development are closely linked since the quality of the environment directly impacts human health and well-being. Faced with current environmental challenges such as pollution, climate change, and biodiversity loss, it is crucial to engage all stakeholders to build a sustainable future. This symposium aims to bring together key actors to discuss strategies for preventing environmental risks, improving public health, and promoting sustainable development in Algeria.

SYMPOSIUM OBJECTIVES

- Analyze the links between environment and health.
- Propose innovative solutions such as green economy and urban agriculture.
- Strengthen environmental policy.
- Raise public awareness on the health impact of environmental factors.
